

SimplePart's Product Upload Feed process gives you the ability to update product catalog information in real time. By uploading one or all of these TAB DELIMITED text files, you can effect an immediate bulk change. When uploaded, you will have the option to use the file contents to "Replace" or to "Append" to your existing product data.

Products.txt

In this file, you specify details about Products. The expected fields can include:

StockCode: A string which uniquely identifies the product.

ProductDescription: A description of not more than 8000 characters which describes the product.

Price: The price at which the product will be sold.

ListPrice: The list price that will be shown for the product.

ShippingCost: A fixed cost which will be charged for shipping for this product. Can be left blank in order for the products shipping cost to be calculated automatically using the shipping rates table. Use this for items that require special freight.

SpecialNote: A string of not more than 8000 characters which enhances the description of the product.

ProductApplication: A string of not more than 8000 characters which describes in additional detail any unique properties of fitment.

Manufacturer: The manufacturer of this product.

ShowOnWebsite: A string, either "Yes" or "No", which indicates whether this product should be shown on the website
